This was my first VR experience. Now I want to see more art!. It's PLANE to see that this game is perfect
4/10. Class 390 Pendolino Train Pack

I bought this purely for the experience of driving a tilting train, looking forward particularly to the sweeping curves of the Northern Fells and Scottish borders on the WCML. Imagine my disappointment then, after driving several slow speed scenarios around the outskirts of Glasgow, when I find myself on a long Northbound run to Glasgow and that you cannot exploit the tilting system to allow high speed travel around bends!! The drive quality parameters for this model are absolutely ridiculous, you are penalised many hundreds of points whilst negotiating bends at speeds well below the allowed maximum. You can travel faster in a standard non-tilting train and receive no penalty.

The most annoying thing about all this is that people have been complaining since 2012 and yet nothing has been done about it. I'm sure all it needs is a small coding alteration to re-set the drive quality parameters. Presumably this will not happen now? I feel like I have been robbed!. Simple and Nerve racking.

Adjusting monitor to darker,
cover up the Score on the right portion of game,
could eliminate some distractions.
Nodding your head and placing the cursor at the point of alignment helps.

Practice makes perfect.

A low cost game for a perfect game achievement.

. The DLC works fine for me (even if it is a bit expensive). A lot of fun! There is a good amount of customization possible in the game. The environment is excellent because of the stadium size, crowd and stats on leaderboards. The game is challenging. A so-so player like me will probably win 1/4 of the volleys. The ball sound is a little too deep/heavy and the bounce sound needs better synchronization. Overall the physics seem pretty good, though some tweaks with ball spin and paddle velocity curve are needed. It would be great if ball weight was something that was customizable because having read a lot of reviews on a few pong games, I don't think we can all agree on how hard we should hit the ball. Bottom line is that this game is worth the money.. An angry ape, crashing percussion, and violence makes APE OUT one of the best adaptations of 2014's *Whiplash* on the market. Always dreamed of being a mushroom

It's not a bad game, but it's also not great. It's more a jack-of-all-trades that does a bunch of things okay, but not much exceedingly well.

Unless you're playing on the easiest level, there's a lot of trial and error as far as what tactics will work best. There's also a lot of randomness involved with hitting enemy units (and them hitting you). This last thing is very frustrating, as I've seen infantry units take out heavy tanks while not being hurt themselves. Graphics are decent, but also pretty grainy and pixelated.

If you're a fan of World War 2 games and you're looking for another one to play, or you enjoy turn-based strategy games, then this will probably suit you well. If you don't care for WW2 titles or you want faster paced action than a turn-based game, it's probably not going to be worth it for you.. Recommended, If you love anything Mech, Sci-Fi, Battling Then you sure have to at least give it a shot.. This game is probably one of the worst games i have seen on the steam market. I only purchased it because i got a 90% discount due to my CSGO trading card badge. I dont get the point of the game, and why people would waste time even bothering to install it.

Id rate this a 0/10. Great art, good story.. what a game this is. forget fifa, world of soccer is the way to go. from insane ui to great passing play, world of soccer will not dissapoint!
